"**OurVoteLive.org** is a website that logs and organizes election-related problems and inquiries across the USA, created by the **Electronic Frontier Foundation**. Since early 2008, it's been used by the **Election Protection Coalition (EPC) [*See this!*]** to coordinate voter assistance efforts in several elections, including the 2008, 2009 and 2010 general elections. The website allows the general public a window onto EPC's election protection efforts by providing anonymized versions of EPC's records."

To report voting problems or intimidation:
